

VoIPVoice USB Headset

"I'm so comfortable, I could chat for hours . . . !"

Imagine the scenario: feet up on the desk, your favourite MP3 playing on the PC and you are making a low cost VoIP call to your friend in China! And they sound so clear; they could almost be in the other room! Impossible...? Not with the USB headset.

Crystal clear call quality: echo-free chat
 Powerful Microphone - enhances your voice on a call
 Portable remote controls - functions at your fingertips
 Free the PC sound card - listen to music while you chat
 Designed for comfort:

- soft, padded earphones
- adjustable microphone and headset

How does it work:

The USB headset plugs into the USB port of your PC / laptop and a simple download installs special drivers for your remote control.

USB Headset facts
